

WHAT NATURE DOES NATURALLY

This is not about medicine, nor about curing people. This is about wisdom.

Being wise enough to look at creation for direction concerning your health.

A large photograph of a white building facade. A large, ornate gold ribbon is tied in a bow and hangs from the top of the frame. Below the ribbon, a sign on the building reads "Nikken Imaging Center" and "UCI Medical Center" in bold, dark letters. The background shows a clear blue sky and some green foliage on the left.

THEORY

The idea is to determine the key to the aging process. N-terminus has focused on this concept. And found the key. The key to unlock the genetic door that stands in the way of the "fountain of youth."

That's been a fundamental precept to the N-terminus principle.

OsteoNecrosis of the Jaw

Reported since 2003

Currently 1,000 lawsuits exist for osteonecrosis of the jawbone.

Kansas City Star article

After Geneva Grimpo fell and broke her hand and arm, doctors put the tiny, fragile-looking woman on drugs to strengthen her bones. Three years into her drug therapy, trouble began.

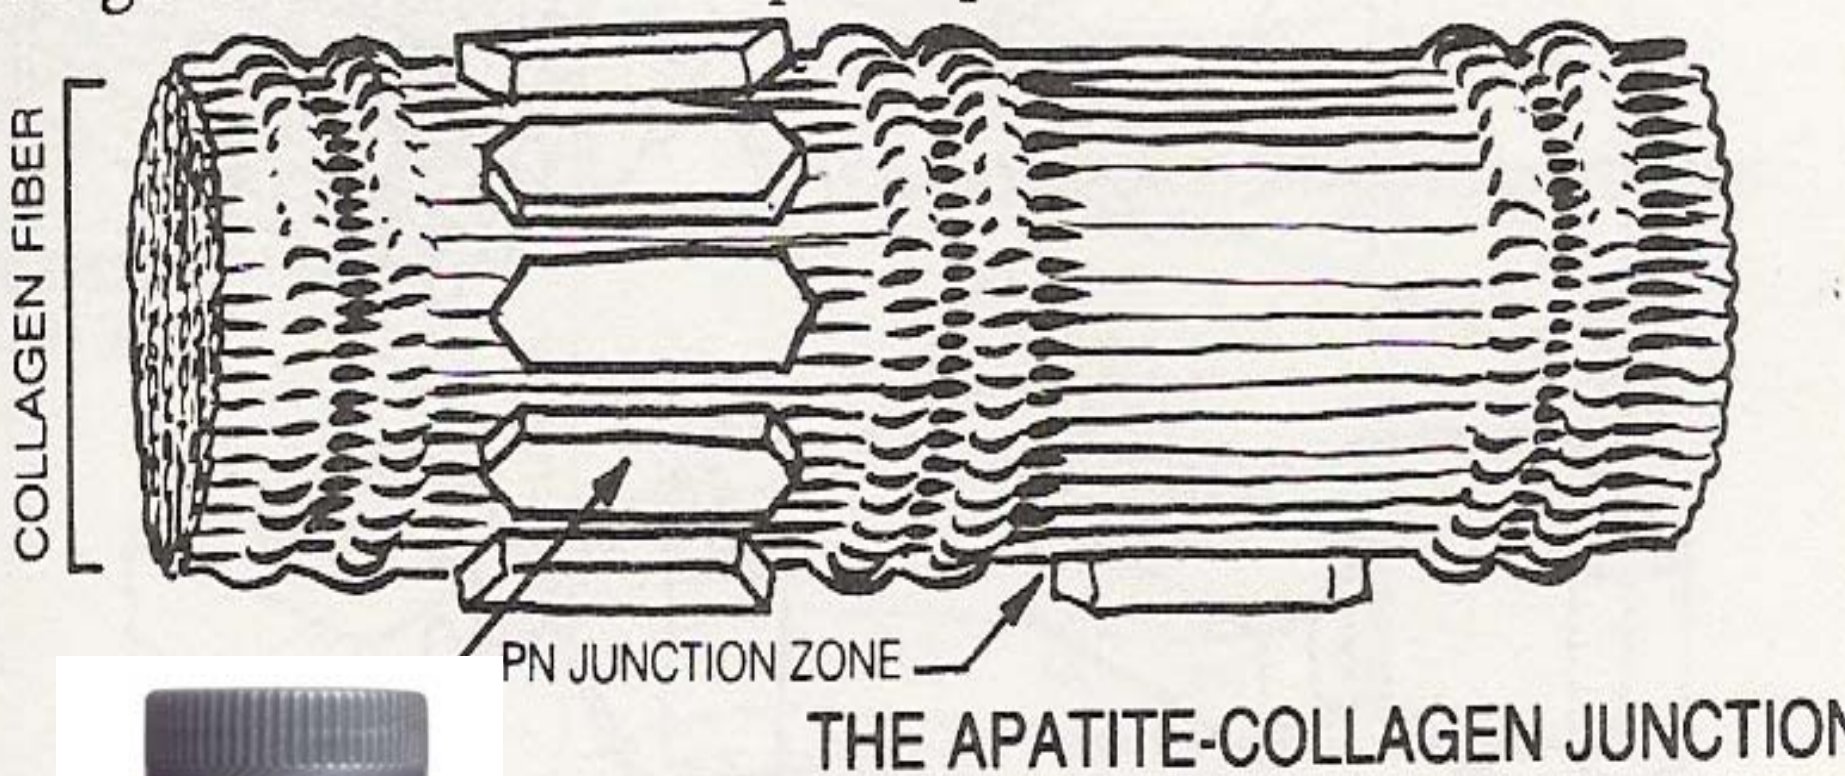

Her lower jawbone poked out through sores on the left side of her mouth where her gums had decayed. The visible bone was dead, and she used her fingers to fish out tiny bits as they broke off.

“Now my right jaw hurts,” said Grimpo, 85. X-rays show that bone is dying, too.
